

## European Energy A/S: Sale of Danish wind farm completed

### Company announcement no. 23

Further to our company announcement issued on 6 December 2019 (cf. company announcement 22/2019), European Energy has today completed the divestment of a wind farm in Denmark with a total capacity of 22.4 MW to a German alternative investment manager.

The wind farm is located in the municipality of Ikast-Brandø, Denmark. The wind farm was commissioned in early 2018 and consists of a total of 10 Siemens-Gamesa 3.2 MW turbines. The German alternative investment manager has acquired 7 turbines, while the remaining three turbines will remain in the ownership of European Energy A/S.

The sale will contribute positively to European Energy A/S' financial position. Contact information: European Energy A/S Jens-Peter Zink, chairman of the board [jpz@europeanenergy.dk](mailto:jpz@europeanenergy.dk) ph. + 45 2047 8220
