Quality Policy for Power-to-X Måde

The success of Power-to-X Måde relies upon our ability to continuously improve. This Quality Policy reflects our commitment to maintain and continually improve our business practices to consistently provide products and services that meet applicable legal requirements and requirements from external and internal customers.

- We continuously improve our work processes and Quality Management System
- We comply with statutory and regulatory requirements to our products and services
- We set quality objectives and follow up on results to be achieved
- We ensure that external providers conform to our Quality requirements
- We examine our opportunities by determining and assessing potential risks associated with these
- We use our Quality Management System to fulfil customer requirements and to monitor and improve customer satisfaction

Questions regarding this policy shall be directed to the QHSE department of European Energy.
